SPECIFIC COMMENTS TO AUTHORS

The manuscript is of practical interest and reflects the tactics of a rare complication of Percutaneous endoscopic gastrostomy. Title. The title of the manuscript reflects its content. Abstract. The abstract summarize and reflect the work described in the manuscript. Key words. The key words reflect the focus of the manuscript. Background. The manuscript adequately describe the background, present status and significance of the study. It is also necessary to add data on the frequency of the procedure in the world and the country of the authors, this will improve the idea of the relevance of the problem. Complications of percutaneous endoscopic gastrostomy are quite rare, so the described complication is of interest. When reading, an analogy arose with the 2016 article: Becker, B. A, & Walker, T. C. (2019). Gastric Outlet Obstruction Due to Malposition of Replacement Gastrostomy Tube. Clinical Practice and Cases in Emergency Medicine, 3(4). <http://dx.doi.org/10.5811/cpcem.2019.7.43626> Retrieved from <https://escholarship.org/uc/item/9h66v950>. A wish to the authors to expand the relevance of the work and the discussion section. Methods and Results are sufficient for this type of manuscript. Discussion is necessary to improve, because violations of the patency of the gastrostomy tube and cases of postoperative intestinal obstruction have been described in the literature before. Illustrations and tables. There were no tables. The illustrations fully explain the content of the article. Biostatistics. Not used. Units. SI units were used correctly. References. The references used are relevant to the topic of the manuscript. Quality of manuscript organization and presentation. The manuscript is written in a good style, the content is clear, but revision of the content in a number of sections is required. Research methods and reporting were observed. Ethics statements
