## SPECIFIC COMMENTS TO AUTHORS

the article proposes a novel solution to an under-researched problem; but the methodology must be improved. The discussion section should be detailed, why measuring the length of varicose veins is important, the measurement methods used in this regard and the success rates should be summarized. The following articles should be reviewed and discussed: " Zhang (2):138-148." "Masood I, Moshksar A, Wong B, Khan H, Saleem A. A comprehensive review of transvenous obliteration techniques in the management of gastric varices. Diagn Interv Radiol. 11 January 2023 DOI: 10.5152/dir.2022.21193" Core type must be added to the work Inclusion and exclusion criteria should be added to the study. Whether the study is in vitro or in vivo, this should be clarified and the study type should be given in the title.
