SPECIFIC COMMENTS TO AUTHORS

Title should be corrected Native English writing should be supported The cited fields in the article should be the same and rearranged. After corrections; I think it would be more appropriate to publish it in the World Journal of Clinical Cases.

SPECIFIC COMMENTS TO AUTHORS

1. The author report a rare case of jejunal hemolymphangioma treated by robotic jejunum surgery. Although jejunal hemolymphangioma is unusual, but it has been reported many times, so it's not that difficult to diagnose. It will be very interesting if the author provide more information before the operation, such as endoscopic images. 2. As this is the first case treated by Robot-assisted laparoscopic, the merit of the new technique compared to traditional surgery has not been discussed fully. In the discussion part, I expect more distinguishing part from the previously published cases.
