COMMENTS TO AUTHORS

Dear Colleague, Thank you for your interesting case. Some recommendations in order to make your manuscript more valuable are below: 1- You use some radiographic and pathologic images. The pathologist and radiologist who diagnoses this patient should be added to authors. 2- Abstract should explain patient's history and outcome better. Abstract and introduction should include your aim of presenting this case. 3- You notice that "gastric metastasis from lung cancer is associated with dismal outcomes". It should give more information about outcome gastric/gastrointestinal metastasis of lung carcinomas (survival time, survival rate, mortal rate, etc.) in discussion. 4- English used in this manuscript should be made better. 5- New document is uploaded with some corrections.

COMMENTS TO AUTHORS

It is a well presented case and important to emphasize the rare metastatic tumors of the stomach. It is important to consider metastatic tumors in the differential diagnosis of gastric malignancy with unusual morphology. I realize that whole article was written by the surgen. I think microscopic description of the tumor morphology by a pathologist will be more appropriate.
