## COMMENTS TO AUTHORS

The authors demonstrated a new surgical technique of lower mediastinal lymphadenectomy and intrathoracic anastomosis of esophagojejunostomy using OrVilTM. They concluded that this surgical technique is easy and safe intrathoracic anastomosis for the patients with gastric adenocarcinoma involving the lower esophagus. #1. The authors should reported about the author's original methods and techniques of anastomosis using OrVil in more detail. Especially the authors should add the method of inserting of anvil transorally. #2. The author should compare between this new technique and conventional technique as to operation time, the mount of bleeding, hospital stay and the complication. #3. I recommend you to figure the schema of this new method of anastomosis. #4. The authors had better to change "COLD" to "COPD" in table 1.
