COMMENTS TO AUTHORS

1. References should be formatted according to the style required by the journal. 2 To strength the paper,the authors should review the available literatures ont he clinicopathologic characteristics of lymphoepithelial cysts and cystic lymphangiomas of pancreas.

COMMENTS TO AUTHORS

This is a retrospective study regarding lymphoepithelial cysts or cystic lymphangiomas in 12 patients. This is a very uncommon pancreatic pathology and the paper carries a significant number of patients. However, the exact diagnosis did not result in avoidance of surgery (11/12 patients). Thus it is not easy at all to make a definite decision when approaching such lesions. The authors should also comment on the symptomatic patients: did their symptoms disappear after surgery?

COMMENTS TO AUTHORS

Dear Authors, Konstantinidis et al reviewed 12 Lymphoepithelial cysts and Cystic Lymphangiomas. The paper should be better written also including patient survival rate, complications and its follow-up. There is no mention of table 1 etc... and figure 1 etc... in the main text. The discussion is poor and should be compared with literature review since it is a small sample.
