COMMENTS TO AUTHORS

Your study was readable and provides some new evidence with regard to the use of Lap VMR as a useful technique in the repair of complete rectal prolapse. There are minor edits can be made to strengthen the paper. Best of luck to you.

COMMENTS TO AUTHORS

This is an interesting paper focusing the outcomes of laparoscopic ventral mesh rectopexy in the treatment of complete rectal prolapse in North Indian population with inherent bulky and redundant colon. Although the case number was not many, results were confident and provides novel information in this field.
