COMMENTS TO AUTHORS

Title: Enhanced recovery after surgery (ERAS): current research insights and future. The authors indicated current research insights and future direction of ERA. This manuscript is very interesting and well written. However, I feel there are some problems in this article. (1) Author should indicate a new additional and future protocol of ERAS in Table, if possible. (2) In title, "Enhanced recovery after surgery ((ERAS): current research insights and future. Enhanced recovery after surgery" should changed to "Enhanced recovery after surgery ((ERAS): current research insights and future."

COMMENTS TO AUTHORS

Dear Authors, I wish to congratulate on your article on ERAS, since I found it interesting, well written and amply documented. I think it is particularly important to address also future directions, in particular the possibility to monitor physical activity as a means to motivate patients in the pre and postoperative period. I recommended publication without changes.

COMMENTS TO AUTHORS

This is a thorough review on ERAS. However, there are a significant number of consensus reviews, reviews, recommendations, guidelines, and I would like the authors to point out what is really new in their review.
