### SPECIFIC COMMENTS TO AUTHORS

In this study, the JIN et al analyzed the influence of clinical data, serological and histological indicators on the prognosis of patients with colorectal cancer. And the indicators that can accurately assess the prognosis of patients with colorectal cancer was

also explored. About 374 patients with colorectal cancer were enrolled in this study, the sample size is big and enough. Overall, the design of this study is well, and the methods are very detail. Results are interesting and well discussed. I have some minor comments to the authors for their consider. 1. Some minor language polishing required an editing. 2. Table required editing, data in the tables should be checked carefully. 3. Discussion is too long, please shorten it. 4. References list is good. The recent references are included.

### SPECIFIC COMMENTS TO AUTHORS

This is an very interesting study about the factors predicting the prognosis of CRC. The study is well designed and the results are very interesting. Some minor revisions are required. 1. The subtitle 'introduction' is missing. Please add it. 2. Tables and figures

### SPECIFIC COMMENTS TO AUTHORS

This study analysed the factors predicting the prognosis of colorectal cancer. I read the manuscript with interesting, and found it's very well written. I only suggest to shorten the discussion, and check the English again.
