SPECIFIC COMMENTS TO AUTHORS

In the current study, the authors try to identify valid targets and a predictive biomarker's system of chronicization of inflammation by using 147 CRC patients and 13 colon adenoma patients and 219 healthy subjects. They found oxidative stress on Trx1/CD30 is

a trigger of cancer disease and the selected oxidation and immune products are a biomarker's system in aging and cancer. Overall, the study is well conducted and interesting, thus, several small flaws should be addressed. 1. Please check the whole manuscript carefully and modify the spelling error and sentence. Such as "147 colorectal cancer patients (CRC) was" should be "147 colorectal cancer (CRC) patients was", "Clinical diagnosis was confirmed histopathologically and patients" should be "Clinical diagnosis was confirmed histopathologically and patients". 2. If possible, please use the age and sex matched controls for the CRC patients. For the distribution of age (66.7 ± 0.1 ; minimum 44, maximum 90) for CRC patients while distribution of age (51 ± 1.1 ; minimum 22, maximum 100) for controls.
