#### **SPECIFIC COMMENTS TO AUTHORS**

The author's purpose of the investigation is very interesting, also for medical and/or scientists from related research fields. I would recommend the suggestions described below: 1) The title should be short and concise. 2) Abstract should be divided into background, aim, methods, results and conclusion. Please revise. 3) Globally, the results are properly described. Figures are very interesting. 4) Discussion should be more assertive and concise and eventually be divided in sections with titles highlighting the major results.
