SPECIFIC COMMENTS TO AUTHORS

This article systematically introduces some rare subtypes of pancreatic cancer, such as acinar cell carcinoma, undifferentiated carcinoma and pseudopapillary tumour, etc. It mainly introduces these rare subtypes of Epidemiology and prognosis, Pathology and molecular biology, Imaging and Treatment. These summarizing materials will help readers understand the histological features of pancreatic cancer more clearly, which is helpful for precise clinical practice. The title of this review is eye-catching, and the body part of the description is closely centered on the topic. The argument is sufficient and combines the latest frontier knowledge of pancreatic cancer. It is a good review for reading.
