SPECIFIC COMMENTS TO AUTHORS

It was with great attention and interest that I read your paper entitled "Gastric neuroendocrine tumor: a practical literature review". I consider the matter pertinent especially after the changes adopted by the new WHO classification. The main drawback would be the fact that some recent articles with the same type of content have already been released. Yet this fact does not detract from the quality of your work. You can find some suggestions in the attached word document (including tables). Once again congratulations on the work developed.
