

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastrointestinal Oncology

**Manuscript NO:** 66902

**Title:** Solid extraintestinal malignancies in patients with inflammatory bowel disease

**Reviewer's code:** 03727521

**Position:** Peer Reviewer

**Academic degree:** PhD

**Professional title:** Assistant Professor

**Reviewer's Country/Territory:** Brazil

**Author's Country/Territory:** Greece

**Manuscript submission date:** 2021-04-09

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2021-04-15 18:39

**Reviewer performed review:** 2021-04-20 20:33

**Review time:** 5 Days and 1 Hour

<b>Scientific quality</b>	<input type="checkbox"/> Grade A: Excellent <input checked="" type="checkbox"/> Grade B: Very good <input type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
<b>Language quality</b>	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
<b>Conclusion</b>	<input type="checkbox"/> Accept (High priority) <input checked="" type="checkbox"/> Accept (General priority) <input type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
<b>Re-review</b>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Peer-reviewer statements</b>	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

## **SPECIFIC COMMENTS TO AUTHORS**

The authors presented a review focusing on solid extraintestinal malignancies (EICs) in patients with inflammatory bowel disease. The aim of the review was to evaluate the prevalence, characteristics, and risk factors of EICs in patients with IBD, and to provide possible measures for prevention and early diagnosis. The authors reviewed the articles published on the main EICs in the population with IBD, including Head and Neck Cancers, Thyroid cancer, Lung Cancer, Cholangiocarcinoma, Hepatocellular carcinoma, Gallbladder cancer, Pancreatic cancer, Gastric malignancies, Breast cancer, Cervical neoplasia, Urinary tract cancers, Prostate cancer, and Skin malignancies. The authors showed data about epidemiology from populational studies and other studies and some points about risk factors related to the tumors. It is an interesting review study, and the issue is truly relevant for IBD population. I have only some minor suggestions: - add the aim of the manuscript in the abstract - prefer Caucasian instead of "white" when describing "Thyroid cancer (TC) is the most common endocrine cancer, and is more common in white, young adults, predominantly females." - correct "such as anti-indegrins" to "anti-integrins" in "Concluding remarks"
