

PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Oncology

Manuscript NO: 69546

Title: Clinical features of intracerebral hemorrhage in patients with colorectal cancer and its underlying pathogenesis

Reviewer's code: 04232981

Position: Editorial Board

Academic degree: MD, MSc, PhD

Professional title: Assistant Professor

Reviewer's Country/Territory: Bangladesh

Author's Country/Territory: China

Manuscript submission date: 2021-07-05

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-07-05 09:31

Reviewer performed review: 2021-07-13 11:17

Review time: 8 Days and 1 Hour

SPECIFIC COMMENTS TO AUTHORS

Name of journal: World Journal of Gastrointestinal Oncology Manuscript Type: ORIGINAL ARTICLE Manuscript Number: 69546 Clinical features of intracerebral hemorrhage in patients with colorectal cancer and its underlying pathogenesis In this article, the authors attempted to investigate the clinical features and underlying pathogenesis of intracerebral hemorrhage in patients with colorectal cancer. However, your article is inadequately presented. Furthermore, there are many grammatical mistakes and spelling mistakes as well. Although the article has scientific rigor, several minor flows need to be improved before publication. Minor Comments: 1. The abstract section is worthy; just need to add a focus point in the abstract section. 2. Delete we, our etc. from the manuscript. 3. Change the sentence "Although the association between cancer and intracerebral hemorrhage (ICH) has attracted the interest of researchers, little attention has been paid to the clinical characteristics and mechanisms of specific cancer-related ICH". Need to make this lucid and clear. 4. Authors need to supplement the up to information related to Colorectal cancer with recent references. This is mandatory. 5. Originality of the work should be improved by the author (either in the conclusion or introduction section). 6. Write the objective/aim of the research clearly in the last paragraph of the introduction section. 7. To minimize the effects of CRC progression on physical activities, patients' functional prognosis on the 30th day after hemorrhage was measured using the modified Rankin Scale (mRS), and a mRS score > 3 was regarded as a poor prognosis. Where is the references? 8. Authors must need to explain figure 2 in the result section. 9. The discussion section is unclear and wordy. Many redundant sentences need to be deleted. 10. The flow of the discussion is still not perfect and unspecific. 11. Statistical analysis section is missing. Need to add precise information (whether mean or SD or SEM etc.). 12. Conclusion has to be
