PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Oncology

Manuscript NO: 65601

Title: Small bowel adenocarcinoma: An overview

Provenance and peer review: Invited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05852316 Position: Peer Reviewer Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: China

Author's Country/Territory: India

Manuscript submission date: 2021-03-11

Reviewer chosen by: Jin-Lei Wang

Reviewer accepted review: 2021-04-02 08:53

 $\textbf{Reviewer performed review: } 2021\text{-}04\text{-}11\ 06\text{:}04$

Review time: 8 Days and 21 Hours

Scientific quality	[] Grade A: Excellent [Y] Grade B: Very good [] Grade C: Good [] Grade D: Fair [] Grade E: Do not publish
Language quality	[] Grade A: Priority publishing [Y] Grade B: Minor language polishing [] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[] Accept (High priority) [Y] Accept (General priority) [] Minor revision [] Major revision [] Rejection
Re-review	[Y]Yes []No

SPECIFIC COMMENTS TO AUTHORS

1.The original findings of this manuscript, Small bowel adenocarcinoma (SBA) is a rare malignancy of the gastrointestinal tract. the incidence of SBA is very low, there is a need for further studies to evaluate the possible application of newer investigative agents and strategies to obtain a better outcome within the framework of international collaborations. This article provides direction and ideas for the diagnosis and treatment of small intestinal adenocarcinoma. 2. The quality and importance of this manuscrip, the rarity of disease, there is paucity of prospective data. The treatment is generally extrapolated from evidence available from colonic cancers. This manuscrip have discussed all the aspects of small bowel cancer in a comprehensive way. 3The limitations of the study and its findings, SBA are rare malignancies with poor prognosis. These are often diagnosed in advanced stage owing to non-specific nature of symptoms. The clinical presentation is varied and vague and a high index of suspicion is required for prompt diagnosis and treatment. It is hoped that the author will provide more information on the diagnosis of small intestinal adenocarcinoma, including pathological diagnosis and whether there are specific immunohistochemical markers.
