SPECIFIC COMMENTS TO AUTHORS

Dear Authors your Letter to the Editor "Exosomes: Promising bio markers and targets for cancer" inspired by the review article entitled "Exosomes as potential diagnosis and treatment for liver cancer " recently published in World Journal of Gastrointestinal Oncology 2022; 14: 334-347 provides very interesting short analysis of discovery, physiology, potential clinical application and problems associated with extraction, isolation and purification of exosomes and large-scale clinical application. It has appropriate title, adequate abstract, and keywords. It is well organized and written., with proper citation. As a comment to the published article it provides better insight to the exosome, its physiology, and potential clinical application giving interesting and appropriate discussion on the data and discussion of the review article "Exosomes as potential diagnosis and treatment for liver cancer".

SPECIFIC COMMENTS TO AUTHORS

Fang et al. wrote a letter to the editor about "Exosomes as potential diagnosis and treatment for liver cancer". They summarized the clinical application prospects and current challenges of exosomes. This paper is well summarized of exosomes and will contribute to the reader's understanding. I don't raise any issues in this paper.
