SPECIFIC COMMENTS TO AUTHORS

Thanks to the authors for this interesting manuscript. The strongest part is the individual approach to the patient, also the literature review is very adequate and meaningful. I have a few comments: 1. The article is not properly formatted according to the Journal's recommendations (spaces, lines, refferences etc.). 2. The figures are too small in size and are not very clear. 3. The patient's informmed consent needs to be modified (more explanation and it should be written in the native language). 4. Abbreviations should appear in the text not as separate section

SPECIFIC COMMENTS TO AUTHORS

This is a case report, and the description of the case scenario, treatment, outcome, and interpretation was all satisfactory. Writing is satisfactory. The formatting (i.e., lines pacing) was a bit off but that's something to be fixed in cooyediting. As there is from my perspective no problems here, can be published.
