COMMENTS TO AUTHORS

This is a good original research article about Incidental Gallbladder cancer (IGBC). This study highlights a potential and not-so-rare pitfall of Laparoscopic Cholecystectomy and suggests that it is necessary a greater awareness of this clinical entity and so could prevent avoidable patient morbidity and mortality. Minor point: - Check the results of Table 1 and Table 2 or clarify the results. - In 42 (53.2%) patients or 42 (53.1%) patients. - Check the text there is some minor spelling mistakes.

COMMENTS TO AUTHORS

The authors have written an interesting paper regarding the incidental gall bladder cancers. Overall the paper is well organized and quite educative giving new information about how this type of cancers should be treated. I believe that merits to be published in WJGO making some minor additions-corrections indicated in attached word file.
