COMMENTS TO AUTHORS

1. In the total of 55 cited paper, 26 of them were published in recent five years, that means the review may be for lack of updated. In my suggestions, it would be better to update the cited literatures. 2. The review should be stated highlightly on controversies of target volumes and dose of radiotherapy (RT) on esophageal cancer treatment, existing present problem, Solution and prospect, et al.

COMMENTS TO AUTHORS

This is a good review article on the radiotherapy in the patients with esophageal cancer. Although almost contents were very nice, the description for CRT and RT alone in the first main section was somewhat confused. In addition, the trivial things were marked in the attached file.

COMMENTS TO AUTHORS

Dear Authors, I read with interest your manuscript entitled "ESOPHAGEAL CANCER MANAGEMENT CONTROVERSIES - RADIATION ONCOLOGY POINT OF VIEW" The manuscript is an accurate overview on the modality of radiation therapy for esophageal cancer. The manuscript, in my opinion is well-write and clear; I really appreciate the manuscript in order to increase my knowledge in this setting. I performed a medline and the references should be updated. I have not found any significant problem in the manuscript.
