### COMMENTS TO AUTHORS

This is a case report on the use of Laparoscopy and Endoscopy Cooperative Surgery (LECS) in the diagnosis and successful treatment of gastric carcinoma originated from the heterotopic submucosal gastric gland. The only criticism is the moderate originality of the paper, since several similar cases have been reported in the last few years. Otherwise the paper is interesting, well written and contains valuable data.

### COMMENTS TO AUTHORS

This manuscript described a rare case of submucosal gastric carcinoma originating from the heterotopic submucosal gastric gland and the authors also described the treatment of the carcinoma by Laparoscopy and Endoscopy Cooperative Surgery. By this manuscript, endoscopists can learn how to diagnose and treat submucosal carcinoma like the reported case.
