COMMENTS TO AUTHORS

It is a new conception on choose the ideal way to colon cancer's operation which may improve the outcome of the patients. This review summarized the development of the understanding about the anatomy of mesocolon and the laparoscopic approach of CME in author's team. The writing of this review was good with reasonable structure and wonderful content. The only shortage should be revised was: The references should be edited by software such as endnote. Some spelling mistake should be corrected. For example the word "mosocolon" in line 12 in page 8, and the word "accet" in line 1 in page 9.
