## COMMENTS TO AUTHORS

Kilic et al wrote a review about current strategies (adjuvant, neoadjuvant chemotherapy and radiotherapy) for advanced gastric cancer. Major comments: many reviews about this topic have been already published, therefore this review is not completely novel. Moreover, the review is too long and, thus, it may bore the reader. Minor comments. Authors should explicit the meaning of "D2 dissection". A minor linguistic revision is needed.

## COMMENTS TO AUTHORS

The article under the title CURRENT ADJUVANT TREATMENT MODALITIES FOR GASTRIC CANCER : FROM HISTORY TO THE FUTURE deals with a very interesting issue. The article is updated referring to recent trials and metanalyses. My only remark is at the section of adjuvant chemoradiotherapy they authors referred to surgery at different trials without describing the type of surgery since its an important issue for the survival whether you perform a gastrectomy D2 or D1.
