## COMMENTS TO AUTHORS

Very thorough review of AIN and its management acceptable for publication in its current form. It would be interesting to add tables with references on incidences as per high risk populations, progression rates from LGSIL to HGSIL and anal cancer if those are available and a table with effectiveness of treatments in a comparative fashion

## COMMENTS TO AUTHORS

This is a very nice review article about the optimum chemotherapy in the treatment of anal cancer. It is very well structured and is comprehensive about the issue. It should be accepted for publication.
