COMMENTS TO AUTHORS

Garattini and coll. evaluate the different aspects of GC molecular subtypes, and discuss the possible future applications of such molecular analyses. The review is really comprehensive and very understanding. It's a good panoramic view of the different molecular aspects (especially genetic) of the various subtypes of gastric cancers. I suggest only a revision of manuscript by native speaker to improve some english sentences.

COMMENTS TO AUTHORS

This article title with "Molecular classifications of gastric cancers: novel insights and possible future applications" should be published at WJGO. It has different approach for gastric cancers. Also, it is well documented.
