COMMENTS TO AUTHORS

On the whole, the authors did a hard work on reviewing different types of stem cells and their possible uses for treatment of bladder pathologies. As the focus of current research, stem cells are widely used in various clinical fields. So this review about stem cells and their possible uses for treatment of bladder pathologies is quite valuable and necessary. In this review, the authors introduced several main types of stem cells in the bladder and urethra and clinical applications of stem cells in bladder pathologies. It may help in other researches. In my opinion, this article can be accepted.

COMMENTS TO AUTHORS

The sections in stem cell overview with adult stem cells and induced pluripotent stem cells could be more concise. I would suggest focusing on stem cells of urinary tract.

COMMENTS TO AUTHORS

The manuscript should provide more details in "Clinical Applications of Stem Cells in Bladder Pathologies" and "Safety and Quality" sections. Otherwise, readers have to search and read references cited.
