## ESPS PEER-REVIEW REPORT

**Name of journal:** World Journal of Stem Cells

**ESPS manuscript NO:** 16897

**Title:** Evaluation of biodegradable electric conductive tube-guides and mesenchymal stem cells (MSCs)

**Reviewer's code:** 00503305

**Reviewer's country:** Thailand

**Science editor:** Fang-Fang Ji

**Date sent for review:** 2015-02-02 22:07

**Date reviewed:** 2015-02-03 21:29

### COMMENTS TO AUTHORS

Dear Sir, The article entitled "Evaluation of biodegradable electric conductive tube-guides and mesenchymal stem cells" is very interesting. The experimental part is very well designed. However, just only minor points should be modified for clear understanding which are: 1. Some abbreviations were used at the first time without having the full term, please check. 2. The abstract is quite too long. It should be very informative and shorter. 3. Figure 1 has no A and B indicated in the figure 4. The SD value in Table 1 such as 24,17 what does this mean? 24.17? The similar confusing signs were also in Table 2-4, please change. 5. It will be clearer if authors can put significant differences sign in Table 1-4.

### COMMENTS TO AUTHORS

Overall, a comprehensive reviewing of the topic. The authors have addressed the key points of human pluripotent stem cells and hepatocyte differentiation in a comprehensive manner. Comments: Figure 3: MISSING. Described in the text but not attached to the provided manuscript. page 24:, line 11: '...added from day 1 to 3...' page 37: '...isolate cells other than...'
