SPECIFIC COMMENTS TO AUTHORS

The authors reviewed biliary stenosis. This manuscript provided current status of the disease in view of diagnosis and treatment. The manuscript was informative and useful. The contents were rationale. Liquid biopsy of bile is a new technology. Are the biomarkers protein, nucleic acid? What biomarkers are examined? Is there any concern that protein or nucleic acid degrades in bile? No texts were found in "Conclusion". Figure legends. Abbreviations should be spelled out when they first appeared in each legend. Photos of Figure 1 seems to be those of legend of Figure 2. Photos of Figure 2 seems to be those of legend of Figure 1.

SPECIFIC COMMENTS TO AUTHORS

Excellent review Would recommend: creating a flow chart to summarize the article and show the work up Article need more spyglass pictures like benign and malignant stricture as well as pathology and FNa
