SPECIFIC COMMENTS TO AUTHORS

Dear author Your paper is interesting however I have some remarks: - I propose changing the title to: " management of gastric neoplasms: A review of the recent advances in endoscopy " - This review summarizes the type of gastric lesion and not just the recent advances in their endoscopic management - Can you add how you did this review? did you have any inclusion criteria for the articles? - The figures were not mentioned in the main text, you must add it - Pay attention to abbreviation, you have to put the details at the first appearance (from the introduction) - After the introduction, I suggest adding this title: diagnosis of the main gastric lesions - Adding EUS pictures will improve the quality of your manuscript - In the chapter of EUS: you have to add that this examination is indicated for suspicious lesion without a diagnosis by conventional biopsy - Many references are published before 2015!! Cordially

SPECIFIC COMMENTS TO AUTHORS

This is an interesting manuscript reviewing recent advances in endoscopic management of gastric neoplasms. Some relatively uncommon gastric tumors including gastric oxyntic gland tumors and lymphoma should be added to the manuscript for analysis.
