SPECIFIC COMMENTS TO AUTHORS

This mini-review paper is written about flexible robotic endoscopy. 1. Although systematically categorized and summarized, there is not a single figure or photograph, making it difficult for the reader to understand. At the very least, images of key technology should be included. 2. There are a lot of abbreviations, so it's better to summarize them. 3. "Endomaster EASE system" in 1.-2), please tell me why "Endomaster" needs to be underlined. EASE" is also suddenly written without explanation. As you will see later, it should be shown in the order in which it is shown.
