COMMENTS TO AUTHORS

The authors have referred to complications of ERCP and point that PEP is the most frequent one. Maybe it is better to list the main complications of ERCP in a table.

COMMENTS TO AUTHORS

This paper describes the role of ERP in the present clinical settings. Although the paper is well written, it includes some problems as described below. 1) The role of ERP for anomalous junction of pancreato-biliary ductal system should be discussed. 2) I doubt whether the paper clearly answers the question that "When should we do it?" The information should be summarized in the conclusion more clearly.
