**COMMENTS TO AUTHORS**

“Helicobacter pylori “ instead of “Helicobacter pylori” (seventh line, Epidemiology). I would place the reference “ Table 1” at the end of Epidemiology and “Table 2” after “early discharge” (30th line, Epidemiology). You should mention Table 3 in the text. It would be interesting some words about the future expectations of OVESCO and the “second look” after the first endoscopy. First lines of Thermal Therapy are difficult to understand. ?Thermal therapies include electrocautery probes (monopolar, bipolar or multipolar) and heater probe (HP), that are referred to as contact thermal modalities, and the argon plasma coagulation (APC) and laser phototherapy, wich are also known as noncontact techniques? I would delete “is a mucosal laceration... or retching” in Efficacy and comparative analysis. It is unnecessary. I would write “Mallory-Weis tear bleeding usually stops...” You repeated “for” in second line of page 11. Conclusion: It would be better lesion instead of ulcer in 8th and 10th lines. I would include “availability” after “position of the lesion, “availability”, experience of the endoscopist...
