		<input checked="" type="checkbox"/> No	

### COMMENTS TO AUTHORS

The manuscript is good. However, I have some comments 1. it don't cover all areas of EUSBD as the best method of track dilation (cystotome, rigid dilators, balloon dilator,...), the extent of track dilation, the rate of complication of different dilation methods, and the needle type (i.e flex needles) for different positions (i.e long position). 2. some grammar mistakes as -a rendezvous technique (RT) can be adopted wherein EUS is used to puncture the bile duct -extrahepatic (EH) when the needle access the CBD directly.
