## COMMENTS TO AUTHORS

The article from USA is aim to review the current state of the literature regarding risk factors for progression from Barrett's Esophagus through dysplasia to esophageal adenocarcinoma, as well as the current need for an integrated scoring tool or risk stratification system capable of differentiating those patients at highest risk of progression in order to target these endoluminal therapies. The title is "Risk Factors Affecting the Barrett's Metaplasia-Dysplasia-Neoplasia Sequence". 1. Overall, it is O.K. 2. Please add the clinical application of the study. The authors should to be recommended the readers to apply this knowledge into the routine clinical practice.
