COMMENTS TO AUTHORS

This manuscript give us a brief introduction about the current status of laparoendoscopic rendezvous in the treatment of cholelithiasis with concomitant choledocholithiasis. The author tell us that this technique is promising and has many advantages such as improved patient compliance, shorter hospital stay, higher success rate and less complications. There are some spelling mistakes in the manuscript. If more detail data are presented to demonstrate the advantages of laparoendoscopic rendezvous, this manuscript will be more convincible.
