COMMENTS TO AUTHORS

It is an elegant manuscript on a topic that fascinates surgeons. The authors offer an interesting contribution to this subject. The manuscript is well written, but needs improvement in English language. For example, the term "pathology" does not mean disease, such as can be found in the text. We also find the term "et al" lost in "Advantages". The figure 1 does not show the necessary details.

COMMENTS TO AUTHORS

Authors indicate a review article about scarless surgery. This manuscript is very interesting and well written. However, I feel there are some problems in this article. (1) Author writes this manuscript slightly in an ornate style. Author should be changed to write this manuscript in more simple English. (2) Author should make reference to the reduced port surgery, TANKO and needlescopic surgery.
