### COMMENTS TO AUTHORS

The authors should be commended for the exhaustive work. However, eccentric English severely detracts from the message that the paper tries to convey. In the readers' main benefit, I strongly suggest the authors to have their paper read through and totally revised by a native English-speaking MD.

### COMMENTS TO AUTHORS

The revision study has great importance concerning the management and diagnosis of Crohn's disease that affects the small intestine. The article is well-written and includes discussions on the existing indices for endoscopic capsule. It is synthetic but comprehensive at the same time. The manuscript deserves publication.

### COMMENTS TO AUTHORS

This is well written review about crohns disease. There is no consensus about CE using in CD. However it is useful for selected patients .
