COMMENTS TO AUTHORS

1. In page 6; ?n introduction section second paragraph which starts with The type of foreing bodies could be omit 2. In page 7 teh abbrv of TC scanning should write what the meaning of TC. 3. In page 9-10-11 type of sections is too long. The authors shollud omit some paragraphs. Because the aim of the study is to explain the management of the foreing bodies. 4.In conclusion setion in page 13 personel sholud change to "hand"

COMMENTS TO AUTHORS

The authors selected an interesting subject, which is significant in clinics. However, some shortages were present in the manuscript. 1. Abbreviations should be explained in the first presence, such as TC scanning. 2. The authors pointed out that non-endoscopic methods are operator-dependent. However, the matters needing attention during the operation were not clarified. 3. The advantages and disadvantages of endoscopic methods and non-endoscopic methods should be compared based on reliable data, such as the cost and the incidence of morbidities. 4. There are many spelling mistakes in the manuscript. 5. The format of tables is not normative.

COMMENTS TO AUTHORS

There are some suggestions for revising this manuscript. 1.The aim of artical is to discuss the difference between endoscopic methods and non-endoscopic methods of removing foreign bodies, the point should be highlighted. 2.When the first appearance of short names ,the full name and the significance should be described clearly. 3.Some spelling mistakes should be corrected. 4.Format of forms should be official.

COMMENTS TO AUTHORS

Direct endoscopic removal of foreign body in pediatric patients is a most appropriate method in countries with highly accessible medical facility. It is not only from Western view but also from other Eastern countries. The manuscript is well written. Few minor misspellings are noted. In page 7, line 5, does TC scanning mean CT scan?
