have anything to add. I found any serious problem with the manuscript. I think this article can be accepted.

1 Title. Does the title reflect the main subject/hypothesis of the manuscript? Yes.

2 Abstract. Does the abstract summarize and reflect the work described in the manuscript? Yes.

3 Key words. Do the key words reflect the focus of the manuscript? Yes.

4 Background. Does the manuscript adequately describe the background, present status and significance of the study? Yes.

5 Methods. Does the manuscript describe methods (e.g., experiments, data analysis, surveys, and clinical trials, etc.) in adequate detail? The author had appropriate data analysis techniques.

6 Results. Are the research objectives achieved by the experiments used in this study? What are the contributions that the study has made for research progress in this field? Yes.

7 Discussion. Does the manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly and logically? Are the findings and their applicability/relevance to the literature stated in a clear and definite manner? Is the discussion accurate and does it discuss the paper's scientific significance and/or relevance to clinical practice sufficiently? Yes.

8 Illustrations and tables. Are the figures, diagrams and tables sufficient, good quality and appropriately illustrative of the paper contents? Do figures require labeling with arrows, asterisks etc., better legends? 9

Biostatistics. Does the manuscript meet the requirements of biostatistics? Yes.

10 Units. Does the manuscript meet the requirements of use of SI units? Yes.

11 References. Does the manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections? Does the author self-cite, omit, incorrectly cite and/or over-cite references? Yes.

12 Quality of manuscript organization and presentation. Is the manuscript well, concisely and coherently organized and presented? Is the style, language and grammar accurate and appropriate? Yes.

13 Research methods and reporting. Authors should have prepared their manuscripts according to manuscript type and the appropriate categories, as follows: (1) CARE Checklist (2013) - Case report;
