

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Hepatology*

**Manuscript NO:** 68417

**Title:** Newer variants of progressive familial intrahepatic cholestasis

**Reviewer's code:** 00008577

**Position:** Editorial Board

**Academic degree:** MD

**Professional title:** Associate Professor, Professor

**Reviewer's Country/Territory:** Italy

**Author's Country/Territory:** India

**Manuscript submission date:** 2021-05-22

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2021-05-31 04:41

**Reviewer performed review:** 2021-06-10 05:33

**Review time:** 10 Days

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors have made an interesting and complete review on progressive familial cholestasis which is enriched with very clear and illustrative images. The already complete review could be enriched by adding some information on mutations of the following genes that can be associated with cholestasis: - JAG1, NOTCH2: Alagille syndrome - SLC25A13: Citrullinemia - CLDN1: Ichthyosis, PSC, Alopecia and Leukocyte vacuoles
