## SPECIFIC COMMENTS TO AUTHORS

it is very interesting paper to show a direct relation between SQSTM1 and hsa-miR-519d-3p, and they could be used as surrogate diagnostic markers for stem cell autophagy in early-stage hepatocellular carcinoma. Albeit, I consider these findings provide insight into the development of liver cancer. I still have some minor suggestions.

1, The author should follow the Journal Guide, and reorganize the Figure and Methods.
