SPECIFIC COMMENTS TO AUTHORS

Figures are nice. Would suggest placing arrow on the area with pathology. Also need to mention in the report and in discussion if the patient had become hypotension at some point as that can cause ischemia and infarct of the liver

SPECIFIC COMMENTS TO AUTHORS

This paper reported a case of multiple extensive hepatic infarctions in a patient with poorly controlled diabetes mellitus. The writing of the full manuscript is relatively complete, and the statement of the case is relatively clear. This case is not completely novel and to make it more interesting, I suggest adding relevant discussion to show the innovation of this paper.
