statements	Conflicts-of-Interest: [ ] Yes [Y] No

SPECIFIC COMMENTS TO AUTHORS

The contribution of the article represents an advance in the area of knowledge. However, I suggest the following two improvements: a) The state of the art of the problem dealt with should be expanded in the introduction. b) The conclusions should be improved by synthetically indicating what the scientific contribution is and proposing a set of lines of work.

SPECIFIC COMMENTS TO AUTHORS

Congratulations to the authors for having investigated in depth such an important aspect as the existence of autoantibodies in relation to living donor liver transplantation. Despite being a retrospective study, the conclusion that there is no difference in the rate of complications is very important and a reference for other transplant groups.

SPECIFIC COMMENTS TO AUTHORS

It is gratifying that the author has solved my concerns one by one. At present, there are no other problems to be corrected, and it is suggested to consider publishing.
