## SPECIFIC COMMENTS TO AUTHORS

The clinical case report describes a case of drug-induced autoimmune hepatitis caused by Skullcap supplements. The novelty is that this is the first description in the literature of hepatotoxicity due to the use of supplements based on Skullcap. A case of hepatotoxicity of the cytolytic type in a 62-year-old woman with Sjögren's disease is described in detail. Adequate biochemical, morphological and histochemical methods were applied. The article has a practical applied nature. I recommend for printing.
