Scientific significance of the conclusion in this manuscript	<input type="checkbox"/> Grade A: Excellent <input checked="" type="checkbox"/> Grade B: Good <input type="checkbox"/> Grade C: Fair <input type="checkbox"/> Grade D: No scientific significance
Language quality	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
Conclusion	<input type="checkbox"/> Accept (High priority) <input checked="" type="checkbox"/> Accept (General priority) <input type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
Re-review	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous
	Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

A very carefully and detailed compilation. Although the number of figures and illustrations is relatively small, the visuals are carefully prepared. The language and expression are easy to understand. If the number of visuals is increased, interest can be kept alive.

SPECIFIC COMMENTS TO AUTHORS

This editorial describes the contemporary concepts of prevention and management of gastroesophageal variceal bleeding in liver cirrhosis patients according to the current guidelines. Generally speaking, this essay is coherent in logic, concise in language and comprehensive in content. But there are still some details that need to be revised. 1. For the introduction part, the concepts of CSPH and advanced chronic liver disease should be further explained. 2. For the primary preventing of gastroesophageal variceal bleeding part, the logic is incoherent, so hope you can sort out the content again and refine the key content. 3. The part to prevent further decompensation of cirrhosis should be further supplemented.
