ESPS PEER REVIEW REPORT

Name of journal: World Journal of Hepatology

ESPS manuscript NO: 11451

Title: Difficulties in diagnosing acute kidney injury post liver transplantation using serum creatinine based diagnostic criteria

Reviewer code: 02835073

Science editor: Ling-Ling Wen

Date sent for review: 2014-05-23 23:21

Date reviewed: 2014-05-29 12:15

COMMENTS TO AUTHORS

This review article described the disadvantage of using serum creatinine in evaluating the acute kidney injury in patients after liver transplantation and provided surrogate markers as well. Major points The text need to be carefully re-edited, for example: the correct use of ‘,’ and space, etc., the capitalized letters in several word, etc. The references should be formatted using standard software and consistent format as the journal requested. Of important, references need to be updated. Table 1 and 2, the abbreviation of ‘Renal replacement therapy (RRT)’ should be placed under the table instead in the title. Other abbreviations for ‘R,IF’ should also be provided. Figure 1, was data from authors own? Otherwise, should be cited and used with permission.
