COMMENTS TO AUTHORS

The short editorial from F. Guerrieri gives a brief overview of non-coding RNAs in liver cancer. The editorial is adequate and I recommend acceptance. English grammar and style are incorrect throughout the commentary and have to be corrected before publication; I strongly advise to have it checked professionally.

COMMENTS TO AUTHORS

In the manuscript, the author concisely reviewed the recent advances in long non-coding RNA in liver cancer. Because of the concise nature, I suspect adding more details could really help readers who are not following this field better understand the article. In addition, the content should be separated into several paragraphs. The manuscript also needs a major language polishing before it can be accepted for publication.
