COMMENTS TO AUTHORS

In this review, the author provided an overview of the current evidence-based information on the role of systemic inflammation in cirrhosis: from pathogenesis to prognosis. The author also discussed the clinical and biochemical inflammation markers and its proposed utility as prognostic tools. This review is described in detail, which, as a valuable information, could help the readers that have better understand the first-hand knowledge of this topic to start novel studies.

COMMENTS TO AUTHORS

This is a review article which explains clearly the relationship between inflammatory response and chronic liver disease. In my opinion, the authors made a very good job, this article allows to the reader to understand easily the role of the inflammation in liver disease.

COMMENTS TO AUTHORS

This excellent review has perfectly gone through the current knowledge about systemic inflammation and pathophysiology/prognosis in cirrhosis, and discussed future perspective. The manuscript comprehensively reviewed key articles addressed on this issue and well organized them. It was appropriately subdivided in sub-titles. The figure and the table are impressive.

COMMENTS TO AUTHORS

This is a very good review paper, evaluating the relation between cirrhosis and systemic inflammation. It is correctly formulated, references are adequate. There are, however, rare minor corrections in English to be done.
