COMMENTS TO AUTHORS

The authors chose a very important and interesting topic ; but the following comments should be considered:

- The authors should carefully correct typographical and grammatical errors throughout the manuscript.
- Generally all figures are very poor; they be made more clear and more informative and elegant.
- Language editing is highly recommended.
- Reference 3 should be updated.
- Section 2.1 : lack novelty and is very brief, should be updated.
- Figure 2 is poor, not clear, not well organized and in certain part confused.
- Section 3: - page 6 second paragraph needs rephrasing.

<http://www.wjgnet.com>

- Section 4: the authors stated in only one sentence and referenced by non recent publication; besides, authors focused on describing their work only for detection of HCV by mouse monoclonal Ab without comparing it with other.
- Section 5: in part 5.1.1 there: there are more recent references for antibodies for CD81 and SR-BI than those used by the author.
- Section 8: mu own suggestion id replace it with section 7.
- Section 9: 1) first paragraph needs references , 2) section 9.1 is lacking , 3) section 9.3 should come before 9.2.
- Section 10: the title of this section is" **New and available trends in antibody productions**" as the authors described available trends before new ones , I suggest to change the title to " available and new..."
