COMMENTS TO AUTHORS

Solinas et al summarized minimal hepatic encephalopathy associated with chronic hepatitis C virus (HCV) infection. Please tell any relation between your review and Journal of Hepatology itself. Is it possible to mention about the paper of World J Gastroenterol. 2013;19(14):2256-61?

COMMENTS TO AUTHORS

The Ms by Solinas et al. reviews in a quite clear manner the state-of-the-art of the connection between hepatitis C and cognitive dysfunction, a distinct form of minimal hepatic encephalopathy. In addition, the authors propose actions to be taken in the future to further understand this incapacitating condition. Overall, it is well written and is quite informative.
